EI1040 Dual Instrumentation Amplifier

General purpose dual instrumentation amplifier. Often used in conjunction with the LabJack U12 to provide analog input gain. Operates from a single 5 volt supply and provides a ± 15 volt supply and a 4.096 volt reference voltage. Analog input range is ± 10 volts. The gain of each channel is set to 1, 10, 100, or 1000 via digital I/O or jumper wires.

For more information, see [the EI-1040 Dual Instrumentation Amplifier Datasheet](#)
