---

## LJTick-DAC

Provides a pair of 14-bit analog outputs with a range of +/- 10 volts. Plugs into any digital I/O block (e.g. FIO4/FIO5), and thus up to 10 of these can be used per LabJack to add 20 analog outputs. Works with T-Series devices (T7, T4) and any UD family device (U3/U6/UE9).

For more information, see [the LJTick-DAC Datasheet](#) and our [LJTickDAC utility](#), an optional a cross-platform setup/testing application available for UD family devices.
