## UE9

## UE9

**The UE9 is not recommended for new users or new applications. New applications should consider the newer T7 or T7-Pro over the UE9. The T7 family is generally superior at a lower price.**

USB or Ethernet DAQ device with 14 analog inputs (12- to 16-bit), 2 analog outputs (12-bit), 23 digital I/O, up to 2 counters, and up to 6 timers.

## USB or Ethernet Multifunction DAQ

The UE9 family was the first LabJack product to incorporate industrial strength Ethernet, and offers a wide range of capabilities. It has a long service record of reliability and customer satisfaction, but new applications should consider the newer T7 or T7-Pro instead.
