Embedded Lua Scripts

While the above examples are run on the host computer, there are also [example Lua scripts](#) which run on-board T-series devices.

Modbus TCP

There are also [direct Modbus TCP examples](#) that do not use LJM. Note that some features, such as [streaming](#), are greatly simplified by the [LJM library](#). A list of the available Modbus registers is available on the [Modbus Map](#) page.

Digit (End of life)

Example code specifically tailored to the [Digit-TL/Digit-TLH](#) can be found in the [appendix-b](#) section of the Digit's datasheet.
